Introducing ACC SUPER CEMENT

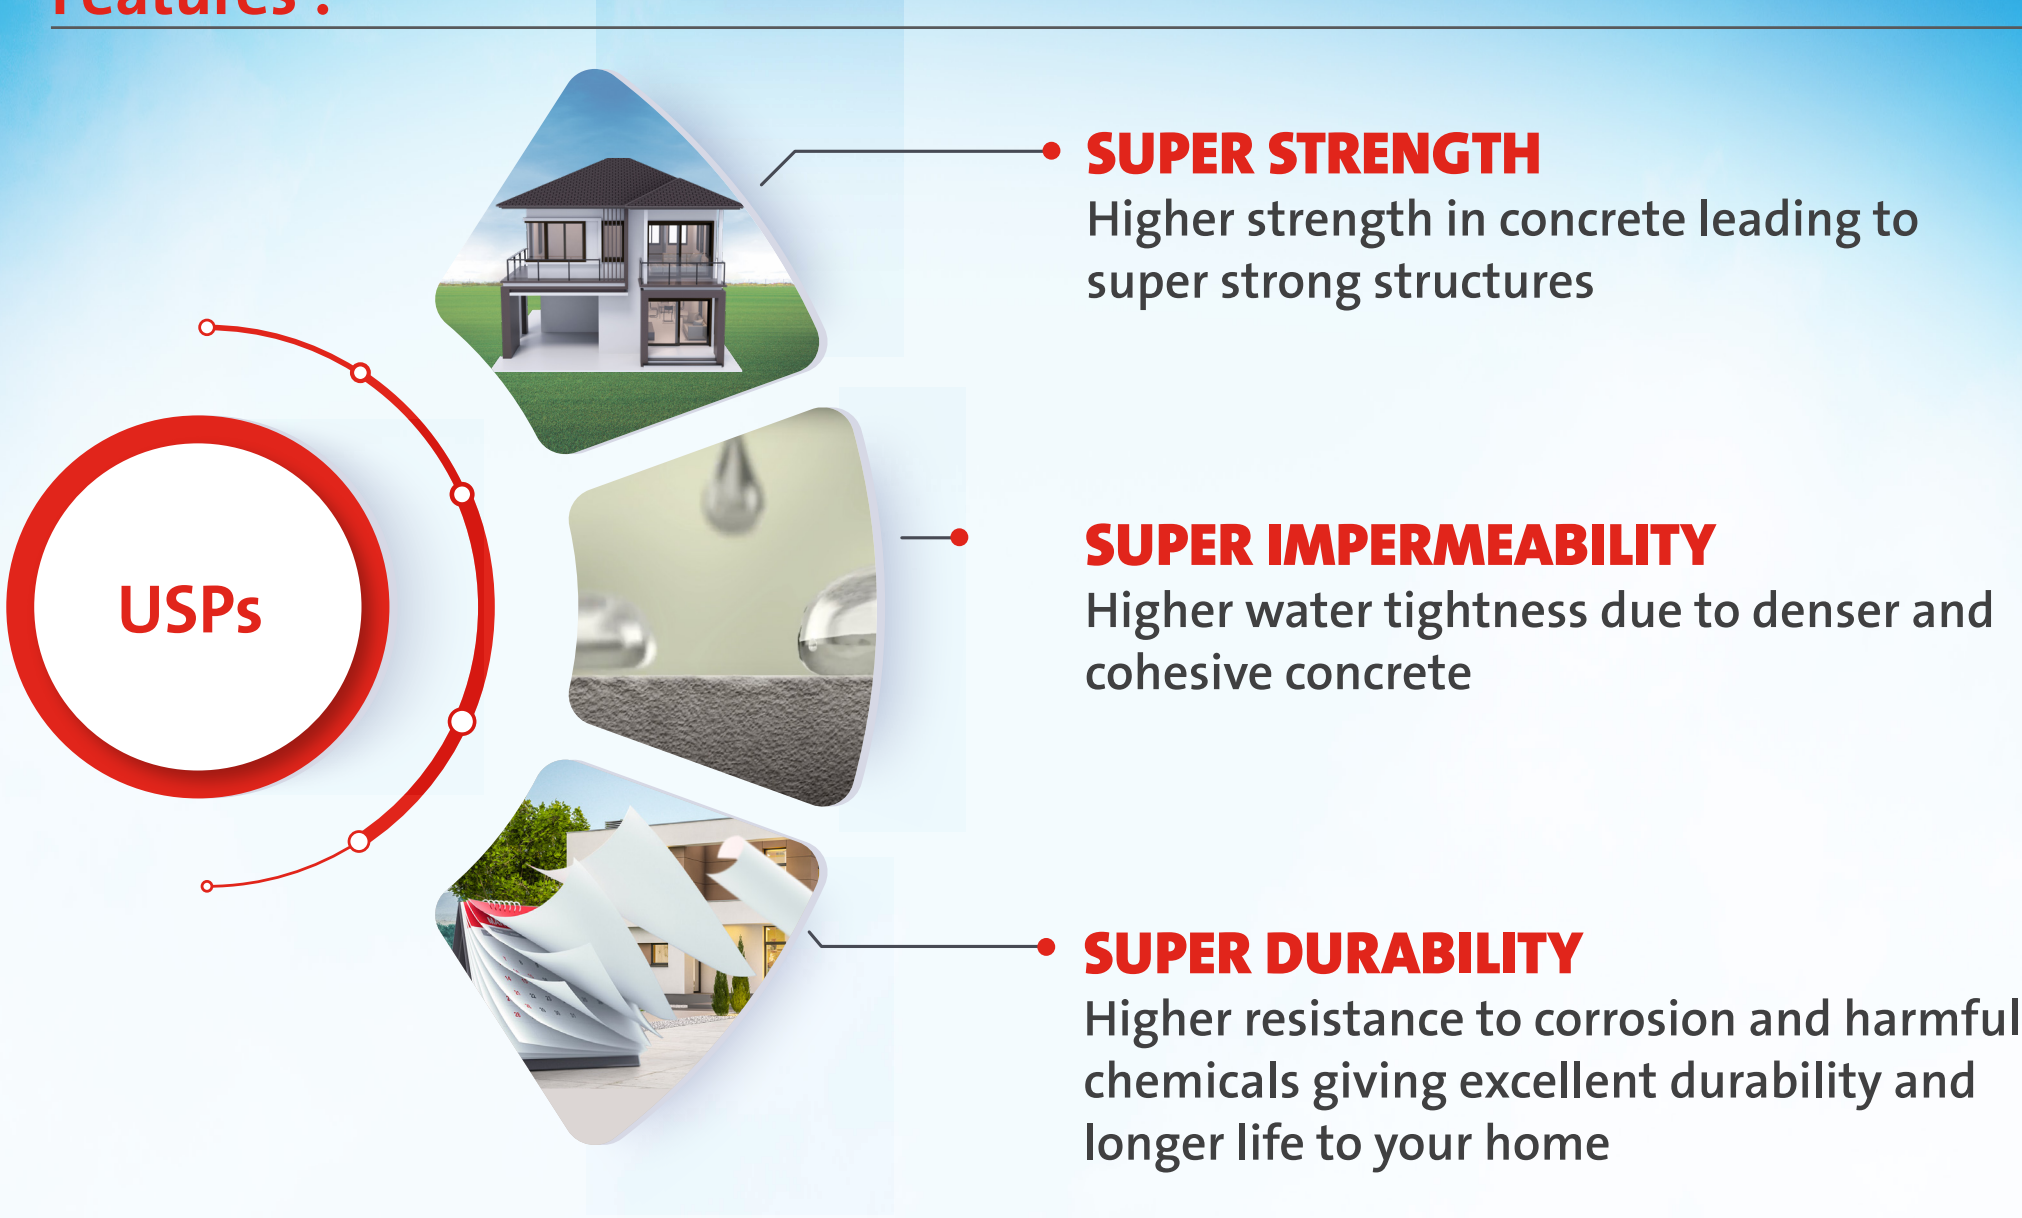

SUPER STRONG HOMES THAT LAST SUPER LONG

ACC Super is engineered with high quality particles that provides faster reaction, higher strength, and denser packing in concrete which makes your home super strong that last super long.

INDIA'S
1ST CEMENT
COMPANY

Features :

Tamperproof AD Star Pack - So no pilferage

Areas of application :

All Application Cement - Be wiser and get 100% protection by choosing ACC SUPER cement in all the applications of home building

✓ FOUNDATION CONCRETE

Ensures the foundations are strong enough to take the load of structure and protect against the chlorides & sulphates in the long run.

✓ SLAB CASTING

Makes the slab super strong and protects against the harmful effects of environment & exposure conditions.

✓ BEAMS & COLUMNS

Ensures beams/columns are capable of standing the load of the slab and protects the steel from corrosion.

✓ WALLS (INTERNAL / EXTERNAL) & CEILING PLASTER

Smooth and faster plastering of walls which saves on material and labour cost due to low rebound loss.

✓ BRICK MASONRY

Excellent workability of cement mortar which helps to carry out masonry work with ease.
